WELDALL FORMS, LONG-TERM, STRATEGIC PARTNERSHIP WITH ORBIS MACHINERY, LLC

February 3rd, 2014 – Weldall Mfg., Inc., the 2012 Wisconsin Manufacturer of the Year, proudly announces a new partnership with Orbis Machinery, LLC. Orbis Machinery, LLC is an engineering and project management company specializing in process equipment systems. With decades of engineering experience in mixing, blending, drying and size reduction, the “outside the box” solutions designed by Orbis Machinery, LLC required a manufacturing partner of the highest quality with a very unique, wide range of experience in fabrication and assembly. Orbis Machinery, LLC designs process systems for the carbon, composites, food, chemical, rubber, silicone, plastics and allied industries. Machinery types include Bulk Powder blending, kneading/mixing, drying and particle size reduction equipment with the ability to process materials critical of variations in temperature, viscosity, and bulk density among other variables. With these types of applications, Orbis Machinery, LLC cannot afford to partner with anyone that was short of the decades of experienced talent and high end quality support equipment provided by the Weldall team.

Orbis Machinery, LLC, based out of Bolingbrook, IL, designs and provides project management services for the installation of process equipment systems that incorporate their specialized equipment designs including Ball Mills, Double Arm Mixers, Drying Equipment, & Ribbon Blenders. Their engineering experience, in excess of 60 years, assures proper application of the proper equipment to best suite-and solve most any requirement.

Weldall Mfg., Inc. has specialized in medium to heavy, “life critical” fabrication, welding, and machining requirements for the past 40 years. Weldall’s continuous efforts to provide more and more “turn-key” solutions to their partners makes them an excellent match for the requirements of Orbis Machinery, LLC. The ASME Code Pressure Vessels Certifications that Weldall possess are an absolute requirement of the applications Orbis excels in.

Both partners look forward to future decades of meeting and exceeding our clients’ needs and expectations. Please contact either or both with questions or if you have an application they can assist you with.
